# PTO Forestry Mulchers

“Mulchers are a long-term investment.  
It is important to us that you remain satisfied with your mulcher.”

SEPPI M. SpA

### Our Commitment

- > Founded in 1939, we have specialized in manufacturing mulchers since 1971
- > Regardless of the manufacturer or brand, we only choose materials and products that meet our rigorous quality criteria
- > Continuous research and development
- > High quality and optimal service

### Your Advantages

- > Reliable equipment as the result of years of experience in the sector
- > High quality materials to take on the harshest work conditions and guarantee maximum durability
- > Advanced technology for an investment for the future
- > Consulting and after sales service: You can rely on us!

### Rotors and Hammers

Wear resistant rotor made of tempered steel with fixed hammers for mulching wood and tilling stumps.

Hammers with inserts of tungsten carbide are extremely hard and resistant. Due to the special composition of the tungsten **CARBIDE** and according to experience, the hammers ensure life of up to 5 times longer than using conventional tools.

Our mulchers equipped with **HELIX Rotor** technology are characterized by extremely fluid and silent operation, thus ensuring utmost efficiency and a significant reduction in noise, and, finally, an excellent work result.

The real shredding job in a mulcher is done by the **COUNTER CUTTERS**. They are made of hot-forged steel and are designed to ensure an excellent shredding performance in terms of producing the finest material. Depending on the model there are more or fewer rows in the chassis and sometimes even under the hood.

Counter cutters are optimizing the power demand and working life of the machine.

The SEPPI M. **PATENTED** system of tool holders protect the hammers and allow an easy replacement for a minimum downtime.

Whether standard hammers or **V-LOCK** - they perfectly fit!

## Sustainable Forest Management with SEPPI Mulching Machines

PTO driven mulchers for tractors from 60 to 500 HP for forestry mulching. Powerful Rotors and tungsten carbide hammers combined with tempered counter cutters ensure perfect mulching results. The chassis of the robust forestry machines are made of wear resistant steel. The optional guard frame supports felling operations and protects the tractor.

max. 13 cm Ø

30-60 (\*-100) HP

## Compact Mulcher for Small Tractors

As the smallest mulcher in this series, MICROFORST mulches brush and bushes up to 13 cm in diameter. The rotors with depth gauge work quickly and accurate with particularly fine results. This dynamic forestry mulcher allows gardeners and landscapers to clean up before, during and after their job; townships use them for the cleaning of brush in urban areas; construction companies, save themselves from recycling organic material before starting a construction site, farmers are able to clean up the surroundings of their fields or mulch the bigger pruning.

## Standard version and specifications

- > Mulches wood up to 13 cm [5"] Ø
- > Working speed 0-5 km/h
- > Chassis made of high tensile and wear-resistant steel AR400
- > ISO 3-point rear linkage cat. 1 & 2
- > 540 rpm gearbox with freewheel and through shaft
- > Belt transmission
- > Hydraulically operated hood
- > Rear chain protection
- > Support skids
- > Helical CUT CONTROL rotor with gauge and tungsten CARBIDE inserts hammers MINI DUO
- > Replaceable tempered COUNTER CUTTERS

## Optional configuration and accessories

- > CUT CONTROL rotor with MINI BLADE
- > Front attachment
- > Several attachments available
- > 1000 rpm gearbox
- > Guard frame

ensures low and easy maintenance

Optional rotor: MINI BLADE tool  
with its sharpened blade  
for a fast and clean cut of wood,  
especially efficient on standing trees

# MINIFORST

max. 20 cm Ø 60-100 HP

## Forestry mulcher for small tractors - versatile in use

MINIFORST is the smallest mulching machine of this series and can be attached to small and medium-sized tractors. It mulches grass and bushes up to 20 cm in diameter. Thanks to the different types of rotors, this mulcher can be adapted for specific work. The standard rotor with fixed hammers with two tungsten carbide inserts is perfect for general forestry operations. For an application where a fast, clean cut is required, the optional hammer rotor with a sharp blades might be the choice. If required, the mulcher will be delivered with a guard frame.

### Standard version and specifications

- > Mulches bushes and wood up to 20 cm [8"]Ø
- > Working speed 0-5 km/h
- > 3 point rear linkage cat. 2 central fixed
- > 1000 rpm gearbox with freewheel and through shaft
- > Belt transmission
- > Hydraulically operated hood
- > Reinforced skids, adjustable in height
- > Protection with chains
- > Tempered counter cutters
- > Standard rotor fixed hammers MINI DUO with 2 tungsten carbide inserts

### Optional configuration and accessories

- > CUT CONTROL rotor with MINI DUO
- > CUT CONTROL rotor with MINI BLADE
- > Front attachment
- > 3 point rear linkage cat. 1 and 2
- > 540 rpm gearbox
- > Guard frame

# MIDIFORST

max. 25 cm Ø 80-130 HP

## Compact forestry mulcher with high performance

The MIDIFORST forestry mulcher is ideal for a wide range of jobs - in forestry: for the care of wood land and forest paths, electricity and gas pipelines, cleaning after the harvesting of wood, for the construction of fire breaks ...

and in agriculture: renewal of existing fruit and wine plants, berry plant and further landscape maintenance.

### Standard version and specifications

- > Mulches bushes and wood up to 25 cm [9.8"]Ø
- > Working speed 0-5 km/h
- > 3 point rear linkage cat. 2 central fixed
- > 1000 rpm gearbox with freewheel
- > Belt transmission
- > Hydraulically operated hood
- > Reinforced skids, adjustable in height
- > Front- and rear protection with chains
- > Tempered counter cutters
- > Standard rotor: combination of fixed hammers with tungsten carbide inserts MINI DUO and MONO PROTECT EXTREME

### Optional configuration and accessories

- > Front attachment
- > 540 rpm gearbox
- > Centrifugal clutch
- > Guard frame
- > Rake hood
- > Support roller (instead of skids)

## MIDIFORST · Specifications

Compact strong forestry cutter for medium sized tractors with reinforced chassis, welded belt protection and lateral deflectors.

# MIDIFORST dt

max. 30 cm Ø 120-[200\*]240 HP

## Strong compact forestry mulcher - the classic!

This forestry machine certainly, punches above its weight with its robust construction.

For a forestry tiller like this, the fixed hammers are the first choice.

The patented rotor shaft and the hammers with additional tungsten carbide inserts make mulching and tilling very efficient. The patented tool holder system allow easy replacement of its hammers for minimum downtime.

Powerful mulcher for upper mid range tractors.  
Strong and robust casing made of high-tensile steel, with replaceable wear plates.

**ADAM™ Alignment system**  
Angular adjustment protects the PTO shaft and the input shaft.  
The range of movement is even greater. (option)

Guard frame for felling operations and to protect the tractor (option)

Easy access due to the hatch for service and maintenance

Lateral material deflectors

Adjustable in height skids, reinforced with replaceable hard metal plate

Heavy chains protect tractor and driver

**HELIX ROTOR**  
**CARBIDE**

Rotor with fixed hammers, for mulching wood and soil cultivation

**COUNTER CUTTERS**

Reinforced chassis with wear-resistant steel plates  
5 rows of tempered counter cutters for a perfect mulching result, interchangeable rows in critical zones

# STARFORST

max. 40 cm Ø 180-350 HP

## Strong and manoeuvrable - highest performance with minimum weight

**Strong:** With the powerful rotor and its hammers with inserts made of tungsten carbide STARFORST withstands powerful mulching & tilling operations.

**Manoeuvrable:** Thanks to the innovative 3-point linkage with automatic alignment, the machine is very mobile.

With ADAM the forestry machine can be raised and lowered deeply for fast and easy tilling of stumps: locate the mulcher on the top of the stump and till it down in one operation - and all that remains is a heap of wood chips!

## ADAM™ alignment system

### ADAM™ alignment system (standard feature)

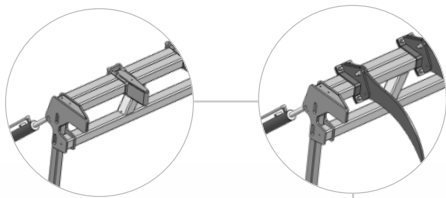

Tilting of the mulcher by gear tracking with PTO shaft alignment. With the W-shaped angles the range of motion increases and the mulcher can be moved up- and downwards even higher. This angular adjustment protects the PTO shaft and the input shaft even at high loads and supports an ideal adaptation to the conditions of the roads. Advantages: longer service life of PTO and input-shaft, even deeper digging, working with an alignment system is easier and faster.

# MAXIFORST

max. 60 cm Ø 300-500 HP

## Powerful mulcher for uncompromising work under the toughest conditions

MAXIFORST takes on the most demanding jobs and handles every challenge. The particularly powerful machine and its powerful transmission with double drive mulches wood up to 60 cm in diameter.

This is the ideal machine for Land Clearing and ROW Maintenance. Whether it is the cleaning up after harvesting timber, maintenance of power lines or cleaning up after hurricanes or forest fires. The integrated cooler ensures a constant performance. Its special strength combined with robust material properties make MAXISOIL a strong partner for large projects.
